

**Name:** Goat Anti-Human Factor P  
**Catalog Number:** A239  
**Sizes Available:** 1.0 mL  
**Concentration:** >40 mg/mL total protein concentration.  
**Extinction Coeff.**  $A_{280\text{ nm}} = 1.0$  at 1.0 mg/mL  
**Form:** Frozen liquid, clear, yellow/tan colored.  
**Activity:** 1/8 versus NHS in immunodiffusion  
1/2,000 effective concentration in Western Blots  
1/4,000 effective concentration in ELISA.  
**Preservative:** 0.09 % sodium azide.  
**Storage:** -20°C or below (long term), +4°C (short term, <30 days)  
**Source:** Goats (*Capra aegagrus hircus*) immunized with highly purified human complement protein.  
**Specificity:** Monospecific for Factor P in human plasma and serum.  
**Origin:** Manufactured in the USA.

### **General Description**

Product is whole polyclonal antiserum from goats immunized with highly purified human complement protein. Product is not a purified IgG fraction. Goats are maintained in FDA certified facilities.

### **Physical Characteristics & Structure**

Antibodies present in the antisera are primarily IgG.

### **Applications**

Western Blots: Effective at dilutions 1/1,000 to 1/2,000 depending on conditions.

Most effective against non-reduced antigen.

ELISA: Effective at dilutions 1/2,000 to 1/4,000 depending on conditions.

Immunodiffusion: Effective against NHS and plasma at 1/8 dilution

**FOR RESEARCH USE ONLY.**

**NOT FOR HUMAN OR DRUG USE.**
